Traction Pillow

NI3663 Cervical neck Traction

Product size

Size: 27.5*13*14-22cm

Material : PVC

Product Features and Selling Points:

- Ergonomic Multi-Circle Design

Three Interconnected Rings: Designed with three rings of varying sizes, this product creates a 15° front-high, back-low elevation. Cervical Spine Traction: Effectively stretches and provides gentle traction for the cervical spine, promoting alignment and relieving tension.

- Enhanced Comfort & Safety

Widened Inner Diameter: The middle ring is designed with a wider inner diameter to minimize pressure on the left and right vertebral arteries. Reduced Compression: Prevents discomfort, suffocation, or strain, ensuring a safe and comfortable experience.

- Optimized Spinal Support

C-Shaped Sponge Support: A contoured sponge at the back conforms to the natural curve of the cervical spine, providing a snug fit and eliminating the tight hanging sensation. Semi-Circular Front Padding: Concentrates traction force for targeted stretching, ensuring effective relief without dispersion of pressure.

- Durable & Leak-Proof Construction

18-Silk Thickened PVC Liner: Ensures durability and resistance to breakage, making the product long-lasting. High-Quality PVC Air Guide Tube: Provides airtight performance to prevent leaks, ensuring consistent and reliable use.

Neck Brace - Soft Cervical Collar

NB4816

Product size

Size:

Length 46.5 to 56.5cm

Height 8.5 to 12.5cm

Material : PVC

Product Features and Selling Points:

- Enhanced Support

The neck brace features a built-in inverted triangular thickened PVC plate, providing strong support from both structural and material perspectives. It maintains the correct and healthy posture of the cervical spine without sagging.

- Superior Comfort

Ergonomic Design: The chin area is designed with a curved contour for a snug and comfortable fit, eliminating any foreign object sensation.

Inner Groove Design: Avoids direct pressure on the throat and carotid artery, reducing the feeling of suffocation and enhancing comfort.

- Innovative Memory Foam Padding

The neck brace is filled with memory foam, offering overall softness and comfort while effectively dispersing jaw pressure, making it suitable for extended wear.

- Breathable and Cool Fabric

Made with ice silk fabric, which is skin-friendly, comfortable, and provides a cooling sensation.

Perforated design on the neck brace enhances breathability, keeping the neck dry and comfortable.

Wheel Chair Seat Cushion

SC1111

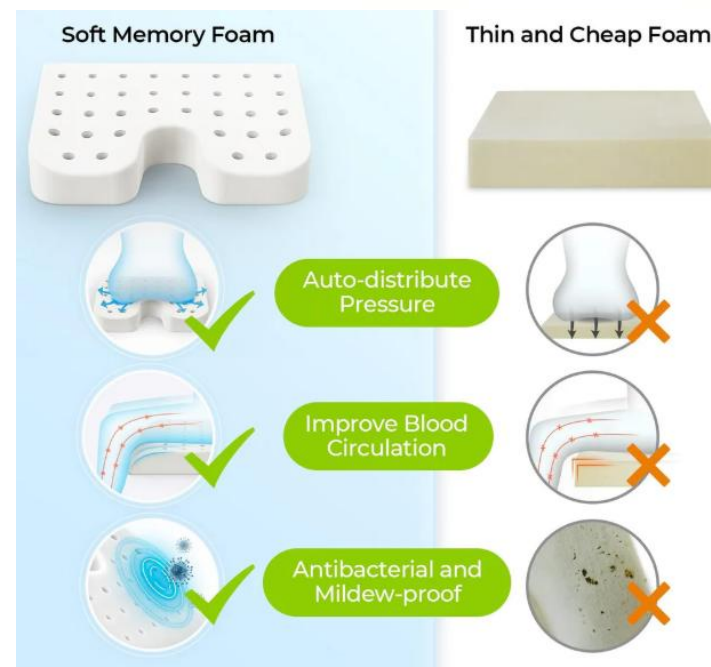

Product information

Size: 45.7*40.5*7.62cm

Weight: 700g

Product Features and Selling Points:

- Secure and Safe Memory Foam
- Ergonomic Design
- Waterproof & Breathable

Wheelchair Cushion
